Section 2I. Required consultation or coordination between the lead agency and/or the RFO and another governmental unit including tribes:

Easements, permissions, or permits:

Access permission will be required.

CWA permit prior to construction in channel is needed.

Water Quality Certification is needed.

A consistency authorization is needed since project location is in the coastal zone.

Mitigation Description:

Avoid impacts to western side of channel to prevent damage to riparian zone adjacent to channel. Work should be conducted from eastern side of channel whenever possible.

Debris will be disposed of off-site when possible to minimize impacts to adjacent riparian areas and to minimize detriment to fish habitat within stream and disposed off in a approved landfill if not chipped on-site.

Reseeding of riparian zone will be required after remove to minimize run-off effects in riparian zone.

Removal will be done in consecutive days to minimize impacts to local wildlife.
